

EVENTS

My Five Senses Festival (August 8th)

Our "My 5 Senses Festival" is a fun-filled day dedicated to exploring the world through our senses. By engaging with various sensory experiences, children enhance their ability to perceive, understand, and interact with their environment.

Technology Week (August 19th-23rd)

Technology Week is an opportunity for students to explore the exciting world of technology while developing essential digital literacy skills.

Dear Parents,

We are excited to share details about upcoming events and learning focuses designed to foster your child's holistic development and strengthen the parent-school partnership.

STUDENTS SKILLS LANGUAGE DEVELOPMENT

Singing together: Music is a powerful tool for language development. Singing together enhances vocabulary and pronunciation, develops listening skills, and fosters a love for language. Through songs, rhymes, and musical games, we will create a joyful and engaging environment for language learning. This coming month, we will share recordings of the songs we learned in Vietnamese and English.

SELF-HELP SKILLS

Feeding and Hygiene: Developing independence is crucial in a child's early years. This month, we will be emphasizing self-feeding and hygiene practices. Our learners know to wash their hands before a meal and to clean their mouths and hands after a meal. These skills foster autonomy and contribute to a healthy and confident child. By encouraging children to feed themselves and practice good hygiene habits, we empower them to take responsibility for their own care.

CREATIVE THINKING SKILLS

Problem-Solving: Problem-solving is a vital skill that lays the foundation for critical thinking and innovation. We will introduce various problem-solving activities to stimulate children's minds and encourage them to think creatively. By exploring different solutions to challenges, children will develop resilience and confidence in their abilities.

Join us during our events this month to see how your child uses the strategies they learned in class to solve problems!

COMMUNITY

We believe a strong partnership between home and school is essential for your child's success. Your involvement in these events and activities will significantly contribute to their development. We look forward to your enthusiastic participation. Here are some tips:

- **Practice Self-feeding and Hygiene Practices:** Practice self-feeding and hygiene practices (with lots and lots of praise!) at home so good habits can form quickly!
- **My 5 Senses Festival:** Collaborate with your child's teacher to contribute an item that stimulates one of the five senses and attend with your child!
- **KidsOnline Albums:** Look at the photos or videos your child's teacher sent via Kidsonline together. It might help spark conversation and motivate your child to discuss everything they do at school!
- **Technology Week:** Feel free to contact your child's teacher to collaborate to organize fun and engaging technology experiences at home.

SUSTAINABILITY GOALS

Reuse and Recycle: As part of our commitment to environmental responsibility, we focus on reducing waste and promoting sustainability. For the "My 5 Senses Festival," we kindly request that you only use and bring reusable containers. Additionally, we will be collecting specific items to create STEM objects, emphasizing the importance of recycling and repurposing materials.

STAY CONNECTED

- **Join the Parent Portal:** Access resources, announcements, and class updates through our communication channels such as Kidsonline and our Facebook Page.
- **Direct communication:** Our teachers and the school administration are always available to listen to your concerns and provide necessary information to foster a strong partnership between home and school to improve your child's development.

We look forward to a fantastic month of learning and exploration!

Sincerely,

Merrystar Kindergarten Team
